6' Medical Connector Hose #570304

Game Ready 6' Medical Connector Hose

Cleaning Instructions

The surface of your Game Ready Medical Connector Hose may be wiped down as needed using soap and water.

To decontaminate the surface, certain commercially available agents may be used, always following the instructions provided with the agent. We recommend Quaternary Ammonia based cleaning agents, such as Cavicide®. When possible, we recommend the use of Caviwipes® or equivalent. A liquid form may also be applied using a soft cloth. In all cases, follow the cleaning agent manufacturer's instructions to determine the necessary exposure time for proper disinfection.

Warnings

- Do not use any harsh or abrasive materials on the Medical Hos
- Do not use any phenolic based cleaners on the hos
- Do not subject the hose to any sterilization protocol (i.e. autoclave or ethylene oxide sterilization)

Maintaining Hose Connection Points

Your hose connection points may require lubrication from time to time. Use only silicone based lubricants as **petroleum based products will destroy the components of the Connector Hose and void your warranty.** You can obtain silicone spray from Game Ready by contacting Customer Service at 1.888.Game Ready (1.888.426.3732).
